Project I

00 - General Course Information

Cláudia Sevivas
<claudia.sevivas@universidadeeuropeia.pt>

Class Outline

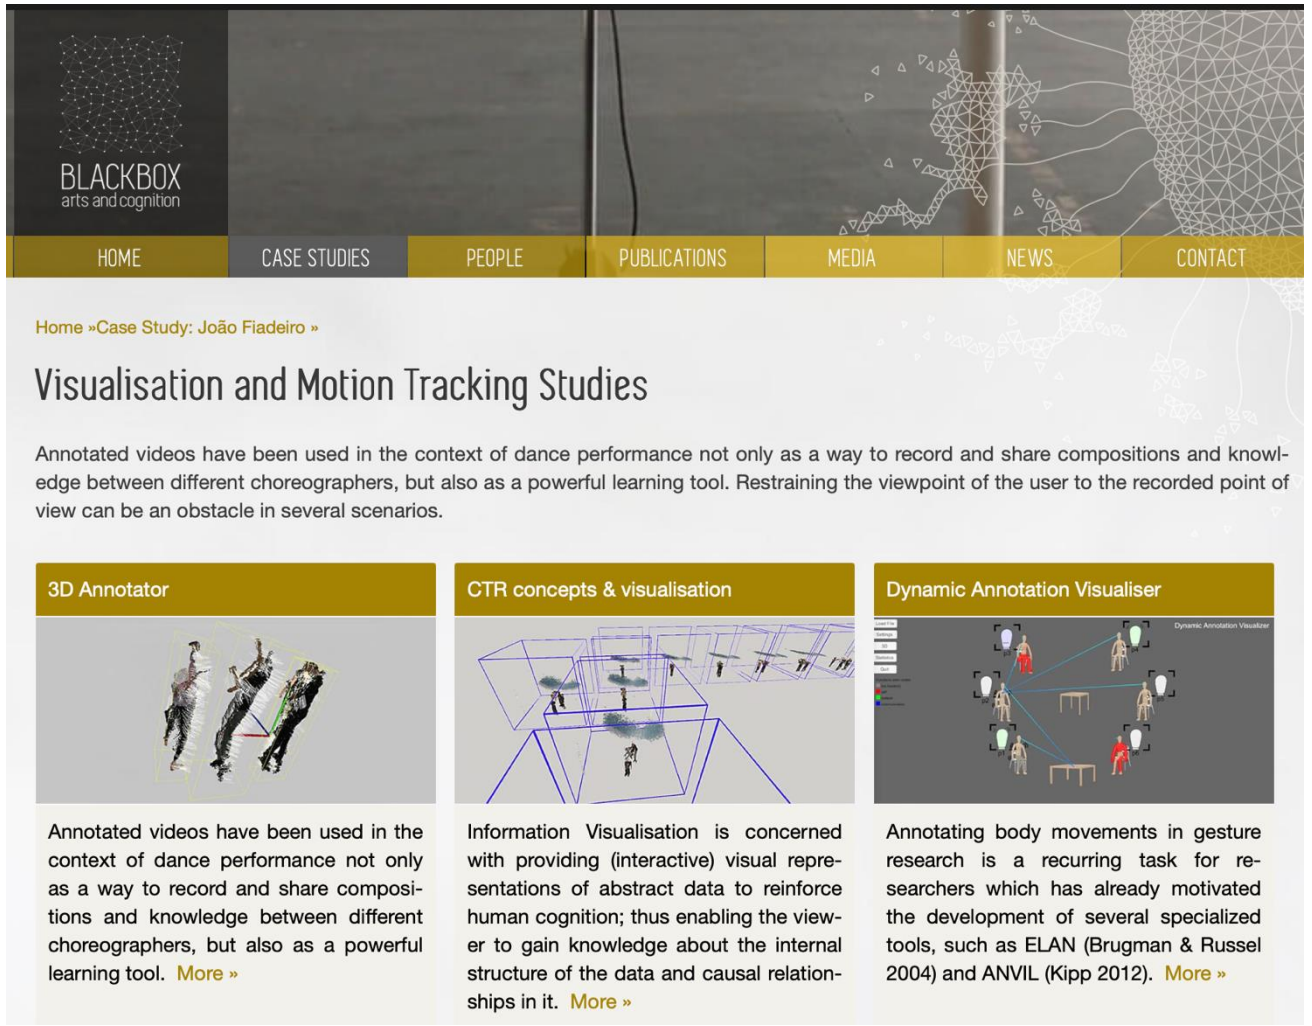

- Introductions – Me, then you
- Choosing Class Representatives
- Tools & Work Methodology
- Researching the Invited Artist
- Short Oral Presentations

Background

- Degree in Computer Science and Engineering at Instituto Superior Técnico, Universidade de Lisboa
  - Major in Artificial Intelligence
  - Minor Video Games
- PhD in Computer Science and Engineering at Instituto Superior Técnico, Universidade de Lisboa
  - Serious Games

BlackBox – Arts & Cognition

A collaborative platform to document performance composition: from conceptual structures in the backstage to customizable visualizations in the front-end.

Existo

- "If we don't want the current generation of women artists to have to wait decades to receive the recognition they deserve, we have to act together now. Countless women artists, actresses, directors, curators, musicians and other creatives, of outstanding talent, can make a huge contribution to a diversity in Europe."

- Graça Fonseca, Monika Grütters e Nina Obuljen Koržinek

Projection Mapping and Live Painting

Interactive Installations

- Lux Frágil and Sirigaita Association

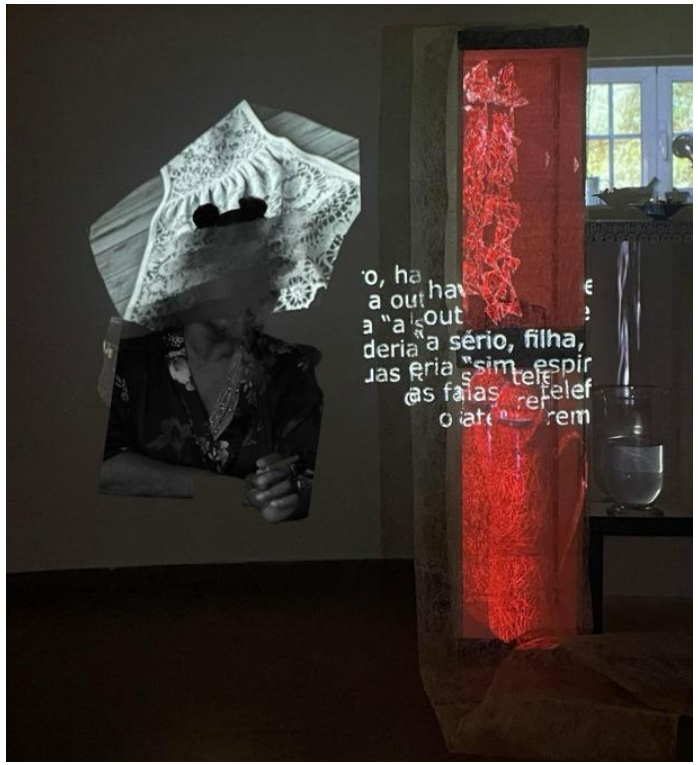

Interactive Installations

- Champalimaud Foundation – Metamersion Healing Algorithms

https://www.fchampalimaud.org/metamersion-healing-algorithms

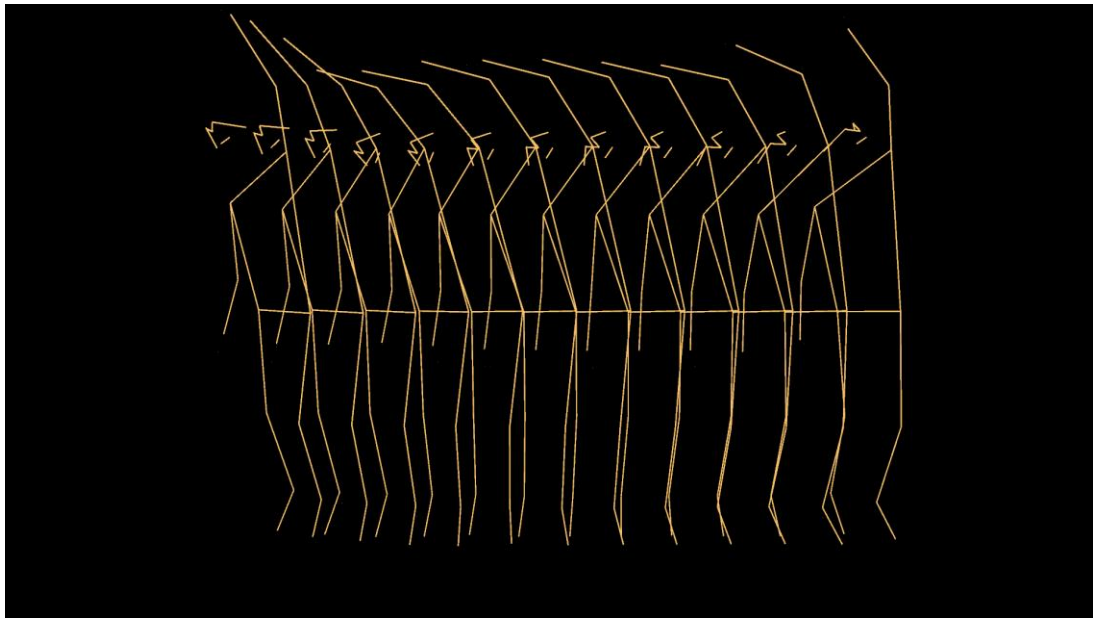

Media/Video Design – Theater and Performance

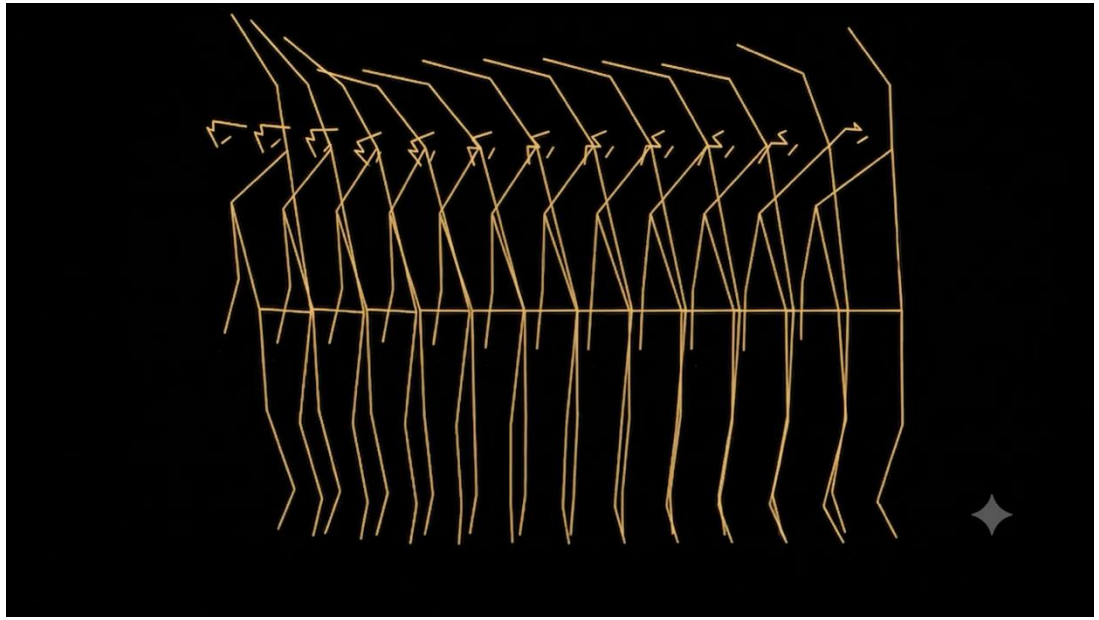

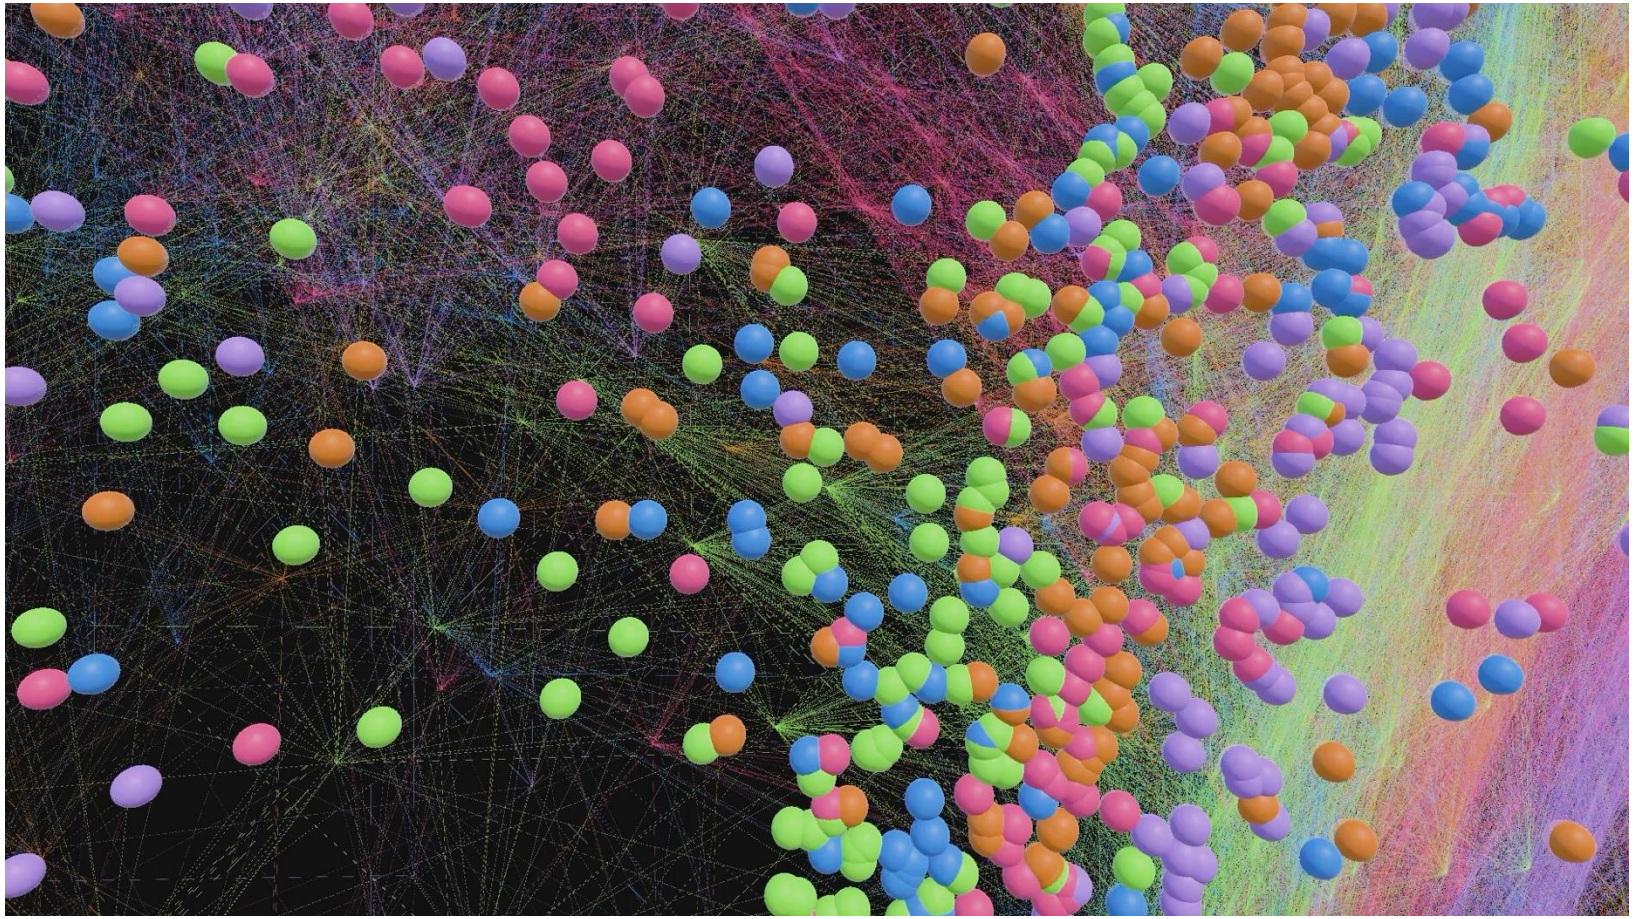

Dance and AI

Dance and AI

IADE – Creative University

- Now you
  - Name
  - Background
  - Why you choose this master program.

Class Representatives

- Delegate and sub-delegate
- Responsibilities:
  - Liaison between students and the coordinator
  - Organize class communications
  - Coordinate group activities
  - Represent student interests in faculty meetings
  - Help with class scheduling and logistics

Tools & Work Methodology

- Development Environment:
  - Visual Studio Code
  - Git & GitHub for version control
  - JavaScript/TypeScript
  - p5.js / ml5.js and for creative coding

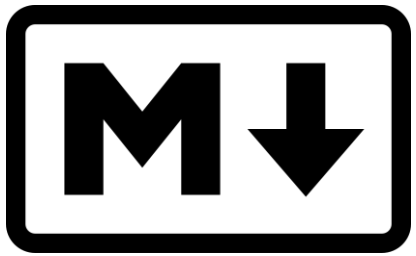

Tools & Work Methodology

- Documentation Tools:
  - Notes management software
  - Trello or similar for task management
  - Figma for design documentation
  - Markdown for technical writing
  - Google Drive for documents

Documentation Requirements

- What You Must Document Throughout the Semester
- Visual Documentation:
  - HD photos and screenshots
  - Design iterations and sketches
  - Video recordings of prototypes
  - Final presentation materials

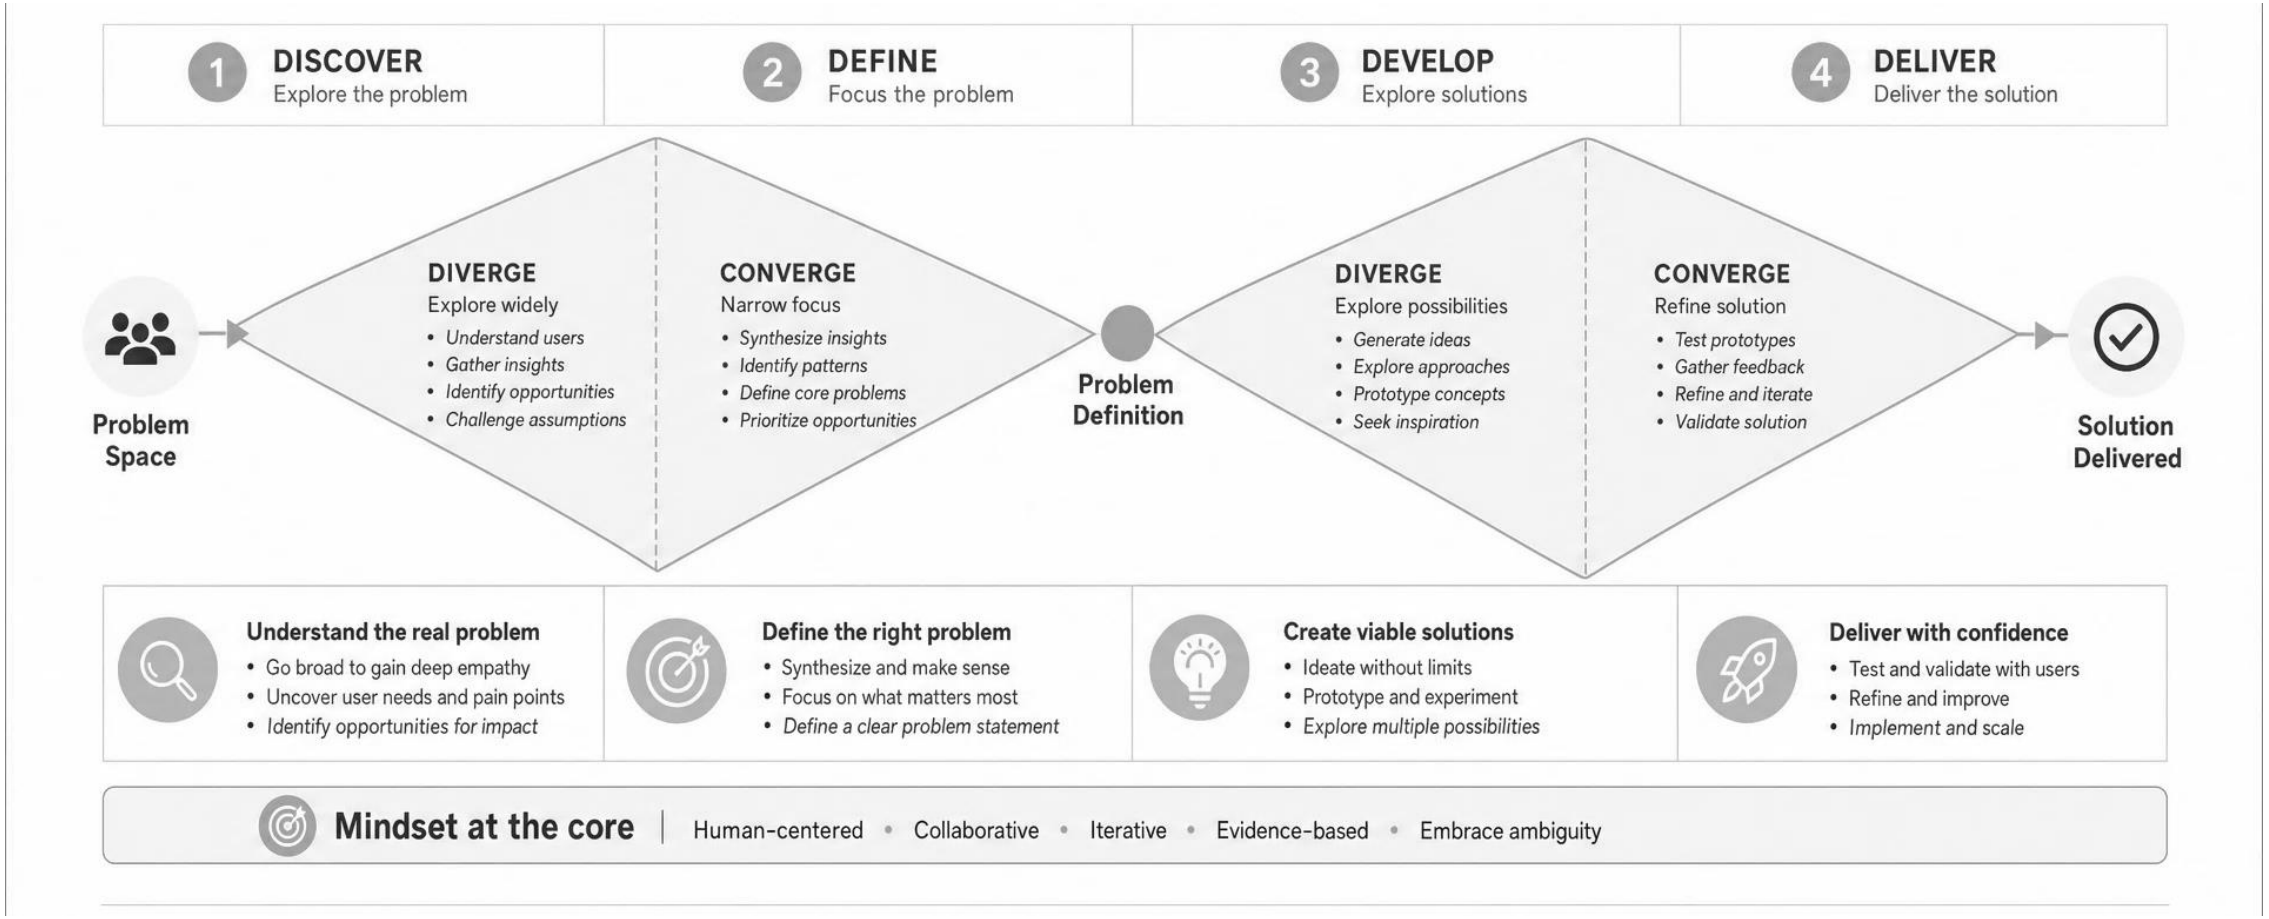

Documentation Requirements

- What You Must Document Throughout the Semester
- Code Documentation:
  - README files for each project
  - Inline code comments
  - API documentation
  - Setup and installation guides

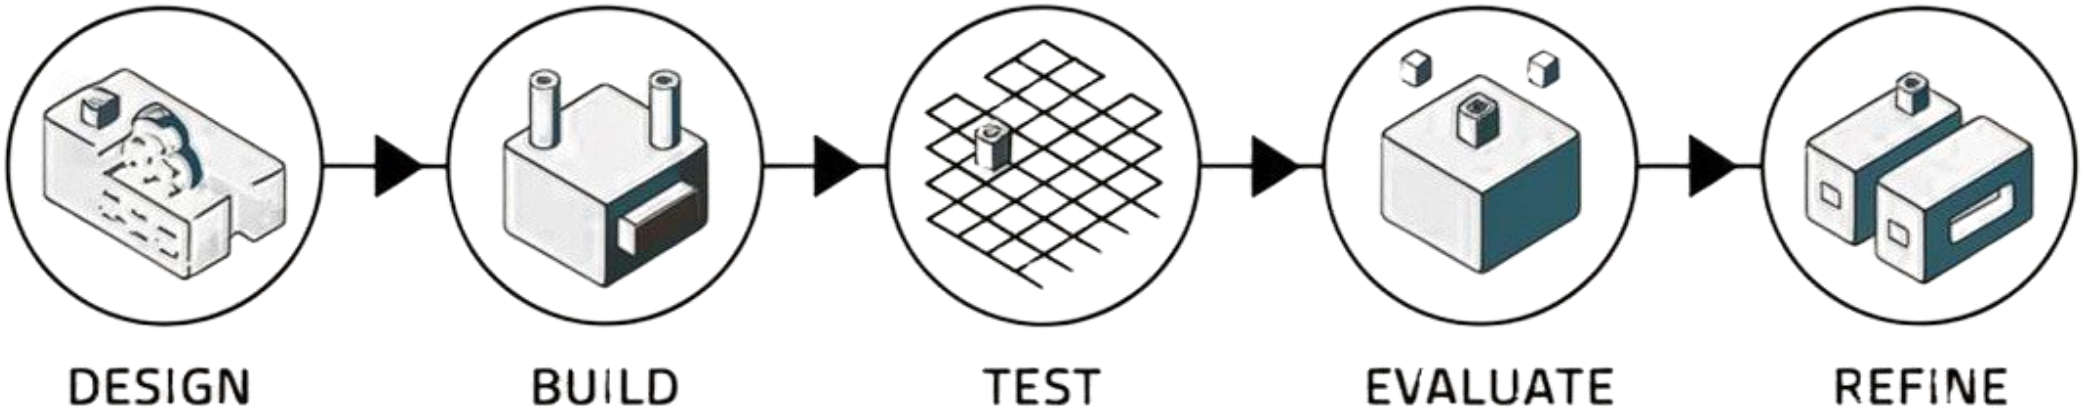

Documentation Requirements

- What You Must Document Throughout the Semester
- Process Documentation:
  - Weekly progress
  - Decision logs
  - Reflection journals

Design Thinking Double Diamond

Iterative Design & Rapid Prototyping

Invited Artist

- Rudolfo Quintas is Portuguese visual artist whose work critically examines the expanding and multilayered relationship between culture and technology. His artistic investigations address the impact of technology on social, political, and psychological spheres, proposing artworks as interfaces that scrutinize and explore this complex interplay.

https://www.rudolfoquintas.com

Exercise

- In groups of 2:
  - Choose 3 Rudolfo Quintas artworks
  - Build a powerpoint presentation with:

Slide	Content
1	Title, year, medium, dimensions
2	Visual documentation (2-3 images)
3	Conceptual framework – What is the artist exploring?
4	Technical analysis – How was it made?
5	Critical reflection – Your interpretation

Presentation: 10 minutes per group
